PUBLIC HEALTH OFFICERS
OF THE COUNCIL

-----oooOooo-----

Medical Officer of Health - G. A. MACGREGOR, M.D., D.P.H., M.R.S.H., F.R.S.P.H & H.

Chief Public Health Inspector - J.B. KELLY, D.P.A.(Dunelm.), D.M.A., A.R.S.H.

Public Health Inspector - C.E. DAVISON, M.A.P.H.I.

Public Health Inspector - E. LEES, M.A.P.H.I.

Public Health Inspector - T. LEES, M.A.P.H.I.

To the Chairman and Members of Crook and Willington U.D.C.

Ladies and Gentlemen,

I have the honour to submit my Annual Report for the year 1969.

During 1969 the birth rate at 12.5 per 1,000 estimated population was well below that of England and Wales at 16.3 per 1,000 population while the death rate was well above at 15.7 per 1,000 estimated population as compared with 11.9 per 1,000 population for England and Wales. These figures generally reflect an aging population. Of the total deaths 52.2% were attributable to diseases of the heart and circulatory system.

Measles was much less in evidence during 1969 but this year was predictable as an epidemic year and it will be interesting to know what effect mass immunisation against the disease will have during 1971 when measles is again expected in epidemic form. It is unfortunate, perhaps, that the publicity given to the side effects of a certain type of measles vaccine in a very few cases out of very many thousands of immunisations given has adversely affected the response to the campaign. For several years now no cases of diphtheria nor of poliomyelitis have been recorded. No cases of food poisoning, dysentery, typhoid or para-typhoid fevers have been recorded although there has been the usual crop of unidentified short term cases of diarrhoea and/or vomiting. Infective jaundice notifications have declined to 1 compared with 20 in 1968.

Preventive measures against poliomyelitis, diphtheria, whooping cough and tetanus were continued as routine measures among children at clinics and schools in the area. Measles immunisations, started in 1968, was also pursued in 1969 but the response was poor.

Tuberculin testing in schools followed by B.C.G. immunisation was continued both among school entrants and at 11 years of age onwards. Contact tracing and early reference of tuberculin positive cases to specialist control were established routine practises.

Slum clearance was pressed forward with vigour and many visits were paid to poor premises for various reasons including illness, management difficulties, problem cases and others.

The attendances at the three Maternity & Child Welfare Clinics were satisfactory but the decline in ante-natal visits continued - a decline which follows a national pattern and is due to the increasing participation of the general practitioner in this field of medicine. The relaxation classes and classes in mothercraft have been moderately successful, and the cervical smear test clinics are proving to be satisfactorily attended.

The chiropody clinics in operation in your area have been increased but still there is no prospect of home chiropody service as yet.

In the sphere of social services and since the inauguration of a central office at Willington, which includes health visitors, mental & social welfare services, home-help service, chiropody and medical officer of health, a much greater degree of co-ordination and co-operation has been achieved, a fact which the general public are beginning to realise more and more to be to their benefit.

The water and milk supplies to your area continued to be satisfactory and gave no cause for alarm from a public health point of view.

Your Chief Public Health Inspector has appended his report to this one.

In conclusion the state of public health in your area for 1969 was satisfactory.

I take this opportunity of thanking my colleagues for their pleasant and welcome co-operation and also the members of the Council for their assistance and continued interest during the year.

I have the honour to be, ladies and gentlemen,

Your obedient servant,

G. A. MACGREGOR,

Medical Officer of Health.

CONDITIONS OF THE AREA

Population (Registrar General's Estimate - Mid Year)	23,050
Area (In Acres)	15,476
Number of inhabited Houses (Mid Year)	8,169
Rateable Value	£501,529
Product of Panny Rate	1,882

Annual Report of the Chief Public Health Inspector.

1. WATER SUPPLY - The Durham County Water Board are the principal suppliers of water in the area and the vast majority of houses are connected to their mains. No houses are supplied by means of stand pipes.

There is no evidence of plumbo solvent action in the water supplied in this area.

2. VISITS - The following is a summary of the visits undertaken by Officers of the department during the year in pursuit of their official duties:-

(1) Housing (Public Health and Housing Acts)	2251
(2) W.C. Conversions and Defective Sanitary Conveniences ...	50
(3) Drainage	299
(4) Water Supply	17
(5) Food Premises and Slaughterhouses	1148
(6) Dairies	-
(7) Overcrowding	2
(8) Tents, Vans, etc.	7
(9) Factories and Workplaces	56
(10) Keeping of Animals	6
(11) Insanitary Ashpits and Receptacles	60
(12) Offensive Accumulations	8
(13) Smoke Nuisances	10
(14) Prevention of Damage by Pests Act, 1949	147

To this list must be added numerous other visits and inspections which cannot be categorised, in connection with the health and well-being of the residents of this district.

3. NUISANCES ETC. - The following table shows the principal nuisances dealt with during the year, by means of notices:-

	Informal Notices Served	Statutory Notices Served	Defects Remedied After Notices
Public Health and Housing Acts	21	3	13
Defective Sanitary Conveniences	1	-	1
Drainage	4	1	4

Other nuisances were remedied and complaints dealt with as a result of informal action by Officers of the department without resorting to the use of notices.

4. SCHOOLS - Occasional inspections of schools in the district were made in connection with sanitary accommodation and washing and canteen facilities. No nuisances were reported.
5. PREVENTION OF DAMAGE BY PESTS - During the twelve months ended 31st December, 1969, 282 properties were inspected and the number of infestations and reinfestations was 233. Treatment was carried out accordingly. No charge is made for the treatment of domestic property but shops and agricultural hereditaments are treated on a cost plus supervision basis. Close supervision of the Council's refuse tips and sewage works continued during the year.
6. SMOKE ABATEMENT - Industrial smoke pollution cannot be considered a major problem in this semi-rural area and informal action sufficed to deal with isolated complaints of smoking chimneys, burning rubbish etc.
7. W.C. CONVERSIONS - During the year 3 W.C. conversions were effected. Ashcloses remain only in property with a short life or where drainage or water supply difficulties exist.

8. SHOPS AND FOOD PREMISES - Continuous supervision of food shops and food preparing premises has occurred during the year to ensure that these premises comply with the Food Hygiene Regulations and attain a satisfactory standard of hygiene.

The following premises in the area are concerned with the manufacture and/or retailing of food:-

- 16 Butchers.
- 4 Chemists.
- 12 Fish Shops.
- 55 General Dealers.
- 39 Grocers.
- 6 Greengrocers.
- 7 Stalls.
- 21 Restaurants, School Kitchens, Hotel Kitchens.
and Canteens.
- 7 Bakehouses.
- 1 Food Factory.
- 15 Premises registered for the preparation or
manufacture of sausage or preserved food etc.
- 3 Premises for the manufacture and sale of ice cream.

The total number of premises registered for the retailing of ice cream is now 60, there being no applications for registration during the year under review.

9. SLAUGHTERHOUSES - 4 registered slaughterhouses were operating during the year, and 1,148 visits were paid to those establishments and food premises generally for the purpose of food inspection and enforcement of hygiene requirements.

The following table gives details of the carcasses and offal inspected and condemned in whole or in part:-

	<u>Cattle -</u> <u>Excluding</u>			<u>Sheep &</u>	
	<u>Cows</u>	<u>Cows</u>	<u>Calves</u>	<u>Lambs</u>	<u>Pigs</u>
Number of carcasses inspected	3521	295	60	8458	5103
<u>All diseases except</u> <u>Tuberculosis and Cysticerci:-</u>					
Whole carcasses condemned	12	41	26	46	19
Carcasses of which some part or organ was condemned	456	40	-	191	522
Percentage of the number inspected affected with diseases other than Tuberculosis and Cysticerci	13.29	27.46	43.30	2.80	10.60
<u>Tuberculosis only:-</u>					
Whole carcasses condemned	-	-	-	-	-
Carcasses of which some part or organ was condemned	-	-	-	-	26
Percentage of the number inspected affected with Tuberculosis	-	-	-	-	.51

No beasts' carcasses were found to be affected with Cysticercus Bovis.

10. FOOD ETC. CONDEMNED - During the year 19 tons 5 cwt. 1 qr. 1 st. 5 lbs. of fresh meat and 7 cwt. 3 qrs. 6 lbs. of miscellaneous tinned food and loose provisions were condemned as unfit for human consumption. Condemned carcass meat is disposed of by the trade to local firms for processing including the manufacture of animal foods and this involves much time-absorbing supervision by the meat inspectors. Unsound tinned food and loose provisions are destroyed at the Council's refuse tips. Carcasses affected with C.-Bovis are subjected to refrigeration for periods of two to three weeks at the prescribed temperature.

11. HOUSING - The following table gives an indication of the year's progress in the clearance of slums and improvement of older houses in the area also the new houses completed during the year:-

Houses demolished during the year	60
Improvement Grant Applications approved	131
New houses erected by Local Authority	60
New houses erected by private persons	36

As in other years a great deal of attention has been paid to the condition, repair and maintenance of housing in the area and the encouragement of improvements to suitable older properties.

12. COLLECTION AND DISPOSAL OF REFUSE AND SALVAGE

Number of premises cleansed weekly	8,242
Number of collections during the year	428,584
Total refuse collected	12,500 tons.
Yield per premise per year	1.52 tons.
Average haul to tips	2½ miles.
Number of tips	3
Dept. establishment as at 31st December, 1969	24 + 1 Rodent Operative
Number of vehicles employed on Refuse Collection including 2 spare ...	7
Number of vehicles employed on:-	
Salvage and Trade Refuse	1
Refuse Disposal Plant	1 Payloader

Collection of refuse was maintained on a weekly basis during the year and the bulk of the refuse collected was disposed of by controlled tipping at the riverside site at Willington.

13. FACTORIES ACTS - During the year 56 inspections of premises subject to the Factories Acts were made principally in connection with sanitary accommodation
14. OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963 - At the end of the year the number of premises registered under the Act was 154 and 305 inspections of registered premises were carried out during the year and the attention of the persons responsible was drawn to the limited number of defects discovered.

In conclusion I would express to the members of the Council my appreciation of their support and encouragement during the year and my sincere thanks to my colleagues and all the staff of the Health Department for their invaluable assistance and co-operation.

J. B. KELLY,

Chief Public Health Inspector.

APPENDIXFACTORIES ACT 1961

Secretary of State for Employment and Productivity

This table is enclosed by request of the/Minister of Labour to indicate to Medical Officers of Health the prescribed particulars which are required by Section 153(1) of the Factories Act, 1961, to be furnished in their Annual Reports with respect to matters under Parts I and VIII of that Act which are administered by the District Council. This table, which is not intended to supersede the fuller statement which is desirable in the text of the Report, should be attached as an annex to the Report.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH
IN RESPECT OF THE YEAR 1967 FOR THE + DUBLIN DISTRICT COUNCIL
OF DUBLIN AND IN THE COUNTY OF DUBLIN
WILLIAMSBURG

Prescribed Particulars on the Administration
of the Factories Act, 1961

PART 1 OF THE ACT

1 - INSPECTIONS for purposes of provisions as to health (including inspections made by Public Health Inspectors)

Premises (1)	Number on Register (2)	Number of		
		Inspections (3)	Written notices (4)	Occupiers prosecuted (5)
(i) Factories in which Sections 1,2, 3,4 and 6 are to be enforced by Local Authorities/.....	2	2	-	-
(ii) Factories not included in (i) in which Section 7 is enforced by the Local Authority.....	68	58	-	-
(iii) Other premises in which Section 7 is enforced by the Local Authority/ (excluding out-workers' premises)	-	-	-	-
Total	70	60	-	-

2 - Cases in which DEFECTS were found

(If defects are discovered at the premises on two, three or more separate occasions they should be reckoned as two, three or more "cases")

Particulars (1)	Number of cases in which defects were found				Number of cases in which prosecutions were instituted (6)
	Found (2)	Remedied (3)	Referred To H.M. Inspector (4)	By H.M. Inspector (5)	
Lack of cleanliness (S.1)	1	1	-	-	-
Overcrowding (S.2)	-	-	-	-	-
Unreasonable temperature (S.3)	-	-	-	-	-
Inadequate ventilation (S.4)	1	-	-	-	-

+ Metropolitan Borough, County Borough, Urban District, Rural District.

✓ To prevent any differences between the lists kept respectively by the Local Authorities and H.M. Inspectors of Factories of the numbers of factories in which sections 1, 2, 3, 4 and 6 of the Factories Act, 1961 are enforced by Local Authorities, it is requested that Local Authorities should compare their lists of factories with the lists kept by H.M. Inspectors of Factories.

✓ i.e. Electrical Stations (Section 123(1)), Institutions (Section 124) sites of Building Operations and Works of Engineering Construction (Section 127), Slaughterhouses, (Section 175(1)(d) and (e)) and Railway Running Sheds (Section 175(2) and (10)).

Particulars (1)	Number of cases in which defects were found				Number of cases in which prosecutions were instituted (6)
